COMPANY OVERVIEW

Introduction

Aromalis India Pvt. Ltd. is a professionally managed Indian company engaged in the manufacturing, sourcing, and global export of premium essential oils, Indian attars, carrier oils, floral absolutes, hydrosols, and specialty botanical extracts.

The company's roots trace back to large-scale aromatic crop cultivation initiated in 1990, followed by the establishment of **Krishna Seeds** in 2006, supporting farmers with quality agri-inputs. By 2014, the network expanded to over 20,000 farmers at the grassroots level, and by 2019, operations scaled across Uttar Pradesh as a leading agricultural input supplier.

Founded in 2026, Aromalis integrates this deep agricultural foundation with modern extraction technologies to connect farm-level production with global markets. With a portfolio of **700+ export-ready products**, the company delivers purity, consistency, traceability, and international compliance to serve aromatherapy, cosmetic, perfumery, wellness, and bulk buyers worldwide.

OUR MISSION AND VISION

Our Vision

To become a globally trusted Indian-origin brand in natural aromatic ingredients, recognized for excellence in quality, sustainable sourcing, innovation, and transparent partnerships—connecting farm-level production to international markets with integrity and responsibility.

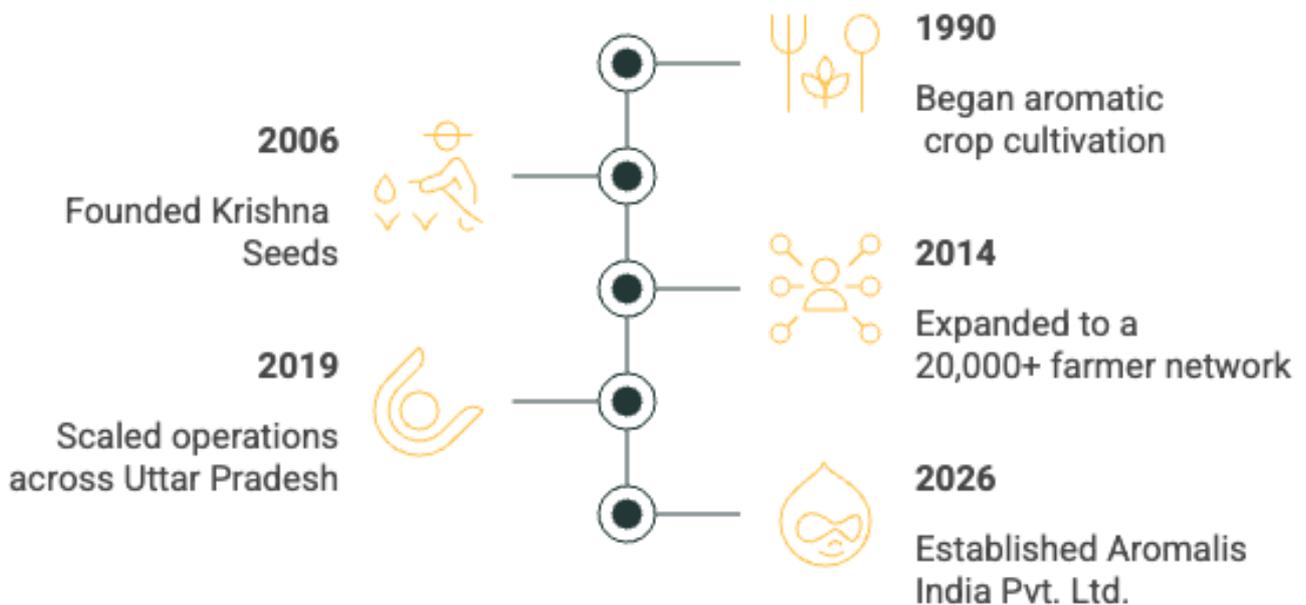

Our Mission

To manufacture and supply high-quality essential oils, attars, and botanical extracts by integrating India's agricultural heritage with modern processing technologies, while ensuring purity, traceability, sustainability, and international compliance. We are committed to creating long-term value for global customers and farming communities through ethical sourcing and consistent quality.

Our Journey

Aromalis' journey in essential oils is rooted in India's aromatic farming heritage, beginning in 1990 with the cultivation of aromatic and medicinal crops. This foundation expanded in 2006 with the establishment of Krishna Seeds, supporting farmers with quality inputs and sustainable practices. By 2014, a network of 20,000+ farmers strengthened traceable sourcing of aromatic raw materials, and by 2019, operations scaled across Uttar Pradesh. Building on this legacy, Aromalis India Pvt. Ltd. was founded in 2026 to produce and export high-quality essential oils and botanical extracts. Today, Aromalis integrates farm-level sourcing with modern extraction and international standards to deliver 700+ export-ready essential oil products to global markets.
